PIPE

pipe-project.eu

PIPE aims to design, implement, and promote a transnational cooperation network focused on enhancing **skills** and **competences** for **migrant populations**.

By providing targeted education and training opportunities, PIPE seeks to **empower** immigrants, refugees, and asylum seekers, fostering their **integration** into host countries while addressing societal, technological, and economic challenges.

The PIPE project envisions a more inclusive Europe, where migrants, refugees, and asylum seekers are fully integrated into society.
By empowering these vulnerable groups with the necessary skills and resources, the project aims to foster a sense of belonging and active citizenship, breaking down barriers to social inclusion and creating opportunities for personal and community development.

Additionally, it works closely with local authorities, social workers, and educators to strengthen their capacity to provide more inclusive services. Through the development of digital tools such as a mobile app, PIPE aims to make these resources easily accessible to all stakeholders involved in migrant integration.

OBJECTIVES

01 Enhance the educational and vocational skills of migrants to improve their employability and social integration

02 Build the capacity of local authorities and educators to better support migrant inclusion and social cohesion

03 Promote intercultural dialogue and understanding between migrants and host communities.

04 Develop digital tools and resources, including a mobile app, to provide easily accessible training and support

05 Develop digital tools and resources, including a mobile app, to provide easily accessible training and support.

06 Facilitate the exchange of best practices and knowledge between European countries to enhance migrant inclusion strategies across borders.

OUTCOMES
